

Product Name :
Capping Compound Heater

Product Code :
TEST5060RFQLAB-0005

Description :

Capping Compound Heater

Technical Specification :

(Electrical) For melting the capping compound. It consist of an electrically heated bath with an energy regulator for controlling the temperature. Suitable for operation on 220 volts, 50 Hz, Single phase supply.

We are a leading manufacturers of Capping Compound Heater testing equipment for a range of industries, including materials science testing lab. We offer full range of Capping Compound Heater testing equipment, including Capping Compound Heater testing kit, Capping Compound Heater testing machine, Capping Compound Heater testing tools, Capping Compound Heater test equipment, Capping Compound Heater test machines, Capping Compound Heater for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Capping Compound Heater testing equipment that helps customers build better, safer, and more sustainable infrastructure.
