

Product Name :
Compression Testing Machines with Digital Readout Unit

Product Code :
TEST5061RFQLAB-0006

Description :

Compression Testing Machines with Digital Readout Unit

Technical Specification :

This series of machines have loading unit and pumping unit as described earlier. Indication of load is on digital display system, which is directly indicated, in respective engineering unit. The electronic display unit is totally microprocessor based with a built in RS232 serial port. It has indication for load, peak load, and pace rate indicator.

Pace rate is achieved manually by controlling the flow control knob and the system is released manually after the peak load is achieved.

Readings can be transferred through the serial port to the computer at an interval of 1 sec till specimen failure

We are a leading manufacturers of Compression Testing Machines with Digital Readout Unit testing equipment for a range of industries, including materials science testing lab. We offer full range of Compression Testing Machines with Digital Readout Unit testing equipment, including Compression Testing Machines with Digital Readout Unit testing kit, Compression Testing Machines with Digital Readout Unit testing machine, Compression Testing Machines with Digital Readout Unit testing tools, Compression Testing Machines with Digital Readout Unit test equipment, Compression Testing Machines with Digital Readout Unit test machines, Compression Testing Machines with Digital Readout Unit for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Compression Testing Machines with Digital Readout Unit testing equipment that helps customers build better, safer, and more sustainable infrastructure.
