

Product Name :
Digital Point Load Tester Bench Type

Product Code :
TEST5038RFQLAB-0003

Description :

Digital Point Load Tester Bench Type

Technical Specification :

The unit comprises of a base frame on which the frame assembly with the integral jack and two load gauges with isolating valves are fixed. The ram of the jack carries the lower cone while the upper cross head has the other loading cone. The cones are made as per Spacer blocks are provided to test samples ranging from EX size to 100 mm size. Maximum clearance between the two cones is approx 125 mm. Lower range gauge of 25 kN is provided for better sensitivity and 100 kN gauge reaches upto the maximum capacity.

We are a leading manufacturers of Digital Point Load Tester Bench Type testing equipment for a range of industries, including materials science testing lab. We offer full range of Digital Point Load Tester Bench Type testing equipment, including Digital Point Load Tester Bench Type testing kit, Digital Point Load Tester Bench Type testing machine, Digital Point Load Tester Bench Type testing tools, Digital Point Load Tester Bench Type test equipment, Digital Point Load Tester Bench Type test machines, Digital Point Load Tester Bench Type for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Digital Point Load Tester Bench Type testing equipment that helps customers build better, safer, and more sustainable infrastructure.
