Product Name:

Combined Electronic Axial Compressometer and Lateral Extensometer for Nx size Sample

Product Code:
TEST5045REQLAB-0006

Description:

Combined Electronic Axial Compressometer and Lateral Extensometer for Nx size Sample

Technical Specification:

This unit is essentially used for finding out poisous ratio of rocks specimen. It has displacement sensors both for lateral extension and for compression.

Total displacement is ± 2 mm with sensitivity of 0.001 mm. Complete with digital display.
