

Product Name :
Permeability Cells

Product Code :
TEST5005RFQLAB-0006

Description :

Permeability Cells

Technical Specification :

Each cell has a chamber with stainless steel base and aluminium top. Stainless steel base is resistive to toxic materials. Acrylic pedestal accommodates different sizes of specimens. 70 mm pedestal is supplied as standard with the unit.

The control panel has a digital readout pressure meter, a vacuum supply gauge, a master vacuum regulator, De-aired water tank controls.

We are a leading manufacturers of Permeability Cells testing equipment for a range of industries, including materials science testing lab. We offer full range of Permeability Cells testing equipment, including Permeability Cells testing kit, Permeability Cells testing machine, Permeability Cells testing tools, Permeability Cells test equipment, Permeability Cells test machines, Permeability Cells testing Instruments. We are suppliers of materials testing tools equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Permeability Cells testing equipment that helps customers build better, safer, and more sustainable infrastructure.
