

Product Name :
Asphalt Slab Roller Compactor Hydraulic

Product Code :
TEST5116RFQLAB-0004

Description :

Asphalt Slab Roller Compactor Hydraulic

Technical Specification :

Asphalt slab roller compactor is used to produce representative sample slabs of several dimensions of asphaltic mixtures laid and compacted on site.

The sample slab can be used to evaluate the high-temperature strength and stability of the asphaltic mixture.

Roller radius: 500mm (width: 300mm)

Roller compaction linear loading range: 200~700N/cm (can be set up freely)

Roller compaction linear loading accuracy: ± 3 N/cm

Roller temperature control range: Room temperature~200?

Roller temperature controlling accuracy: ± 3 ?

Rolling times per minute: 12 times/min ± 1 time/min

Slab specimen: 300*300*(30~100)mm

Power: 380V AC, 3.0kW (need working null line)

We are a leading manufacturers of Asphalt Slab Roller Compactor Hydraulic testing equipment for a range of industries, including materials science testing lab. We offer full range of Asphalt Slab Roller Compactor Hydraulic testing equipment, including Asphalt Slab Roller Compactor Hydraulic testing kit, Asphalt Slab Roller Compactor Hydraulic testing machine, Asphalt Slab Roller Compactor Hydraulic testing tools, Asphalt Slab Roller Compactor Hydraulic test equipment, Asphalt Slab Roller Compactor Hydraulic test machines, Asphalt Slab Roller Compactor Hydraulic for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Asphalt

Slab Roller Compactor Hydraulic testing equipment that helps customers build better, safer, and more sustainable infrastructure.
