

Product Name :
2000N Compression Testing Machine

Product Code :
TEST5061RFQLAB-0011

Description :

2000N Compression Testing Machine

Technical Specification :

2000N compression testing machine is used to evaluate compressive strength of building materials such as brick, cement mortar and concrete.

Max. capacity: 1000kN: 2000kN

Measuring range: 0-1000kN: 0-2000kN

Relative Error: $\pm 1\%$: $\pm 1\%$

Platen size: 220x280mm: 220x290mm

Max. vertical clearance between platen: 320mm: 330mm

Max. travel of piston: 40mm: 40mm

Diameter of piston: $\varnothing 250$ mm: $\varnothing 250$ mm

Rated pressure of oil pump: 40Mpa: 40Mpa

Power supply: 220V AC, 750W: 220V AC, 750W

We are a leading manufacturers of 2000N Compression Testing Machine testing equipment for a range of industries, including materials science testing lab. We offer full range of 2000N Compression Testing Machine testing equipment, including 2000N Compression Testing Machine testing kit, 2000N Compression Testing Machine testing machine, 2000N Compression Testing Machine testing tools, 2000N Compression Testing Machine test equipment, 2000N Compression Testing Machine test machines, 2000N Compression Testing Machine for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use 2000N Compression Testing

Machine testing equipment that helps customers build better, safer, and more sustainable infrastructure.
