

Product Name :
Compression Testing Machine

Product Code :
TEST5061RFQLAB-0012

Description :

Compression Testing Machine

Technical Specification :

With appropriate clamping jaws and measuring device, compression testing machine can be used for tests such as concrete splitting tensile, bending and static elastic modulus test.

Max. capacity: 2000kN

Measuring range: 0-2000kN

Relative error: $\pm 1\%$

Platen size: $\varnothing 250\text{mm}$

Max. vertical clearance between platens: 320mm

Max. travel of piston: 100mm

Diameter of piston: $\varnothing 250\text{mm}$

Rated pressure of oil pump: 40Mpa

Power supply: 220V AC, 750W

We are a leading manufacturers of Compression Testing Machine testing equipment for a range of industries, including materials science testing lab. We offer full range of Compression Testing Machine testing equipment, including Compression Testing Machine testing kit, Compression Testing Machine testing machine, Compression Testing Machine testing tools, Compression Testing Machine test equipment, Compression Testing Machine test machines, Compression Testing Machine for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Compression Testing Machine testing equipment that helps customers build better, safer, and

more sustainable infrastructure.
