

Product Name :
300kN Compression Testing Machine

Product Code :
TEST5061RFQLAB-0013

Description :

300kN Compression Testing Machine

Technical Specification :

Compression testing machine is used to test compressive strength of building materials such as brick, cement mortar and concrete.

Max. capacity: 100kN: 300kN

Relative error: $\pm 1\%$: $\pm 1\%$

Platen dimension : $\varnothing 125\text{mm}$: $\varnothing 125\text{mm}$

Max. vertical clearance between platens: 180mm: 180mm

Max. travel of piston: 80mm: 80mm

Diameter of piston: $\varnothing 125\text{mm}$: $\varnothing 125\text{mm}$

Rated pressure of oil pump: 25Mpa: 25Mpa

Power supply: 220V AC, 750W: 220V AC, 750W

We are a leading manufacturers of 300kN Compression Testing Machine testing equipment for a range of industries, including materials science testing lab. We offer full range of 300kN Compression Testing Machine testing equipment, including 300kN Compression Testing Machine testing kit, 300kN Compression Testing Machine testing machine, 300kN Compression Testing Machine testing tools, 300kN Compression Testing Machine test equipment, 300kN Compression Testing Machine test machines, 300kN Compression Testing Machine for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use 300kN Compression Testing Machine testing equipment that helps customers build better, safer, and more sustainable infrastructure.
