

Product Name :
12000kN Compression Testing Machine

Product Code :
TEST5061RFQLAB-0015

Description :

12000kN Compression Testing Machine

Technical Specification :

Compression testing machine is used to test compressive strength of building materials, lifting jacks and metal components.

Max. capacity: 12000kN

Measuring range: 0-12000kN

Relative error: $\pm 1\%$

Max. vertical clearance between platens: 1500mm

Max. travel of piston: 120mm

Diameter of piston: $\varnothing 630\text{mm}$

We are a leading manufacturers of 12000kN Compression Testing Machine testing equipment for a range of industries, including materials science testing lab. We offer full range of 12000kN Compression Testing Machine testing equipment, including 12000kN Compression Testing Machine testing kit, 12000kN Compression Testing Machine testing machine, 12000kN Compression Testing Machine testing tools, 12000kN Compression Testing Machine test equipment, 12000kN Compression Testing Machine test machines, 12000kN Compression Testing Machine for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use 12000kN Compression Testing Machine testing equipment that helps customers build better, safer, and more sustainable infrastructure.
