

Product Name :
Shrinkage Measuring Apparatus for Concrete

Product Code :
TEST5001RFQLAB-0003

Description :

Shrinkage Measuring Apparatus for Concrete

Technical Specification :

Shrinkage measuring apparatus for concrete is especially designed for measuring length (volume) changes of concrete specimen during the hardening under certain environmental condition, providing a reliable basis for research, education, quality control and testing about concrete characteristics in research institutes of building sciences, education sectors, design and construction units.

Measuring range: 534~545mm

Length of standard rod: 540±0.2mm

Dial gauge range: 0~10mm
