

Product Name :
Portable Arc Welding Machine

Product Code :
TEST5185RFQLAB-0003

Description :

Portable Arc Welding Machine

Technical Specification :

Portable Arc welding machine

Powerful Welding Capability: With advanced IGBT inverter technology, this welder is capable of welding a variety of metals, including mild steel, stainless steel, cast iron, and more.

Portable and Convenient: With a compact design and easy-carry handle, this welder is perfect for use anywhere you need it. It's also energy-efficient, reducing damage to copper and iron and increasing welding frequency.

Versatile Welding Options: This welder is suitable for welding a variety of metal materials, including stainless steel, mild steel, aluminum, and more.

Easy to Use: With a digital display LCD and included electrode holder, work clamp, input power adapter cable, and brush, this welder is easy to set up and use for all your welding needs.

Portable Arc welding machine DC inverter welder

Voltage : 220V

Frequency: 50Hz

Rated duty cycle: 85%(250A)

Built in hot start

Anti-stick: Yes

Dig-arc force: Yes

Kits includes:

1Pc: Arc welding machine

1Pc: Stick welding rod electrode holder

1Pc: Arc welding ground clamp
2Pcs: Quick plug

Testing lab instruments India
