

Product Name :
Power Tools Spot Welder

Product Code :
TEST5185RFQLAB-0005

Description :

Power Tools Spot Welder

Technical Specification :

Spot welder

Single Phase Design - Easily weld together different types of materials with the single phase design. Simple welding mechanism allows you to quickly insert the materials and press to weld.

Durable Welding Tips - Welding tips are constructed from high quality steel to get the perfect weld for materials that have a thickness.

Replacement Tips - Spot welder comes with extra pair of welding tips for multiple uses. Simply twist the tips off when they are ready to be replaced and screw on the new one.

Simple Lever Function - To perform welding applications, simply apply pressure and press down on the lever.

Portable Design Machine - The attached handle allows you to quickly transport your spot welder to different job locations quickly.

Portable spot welder

Voltage: 220V

Frequency: 50Hz

Outlet Voltage: 2.5KVA @50% duty cycle

Throat depth: 6inch

Weldable material: Uncoated mild, galvanized, or stainless sheet steel.
