Product Name :
Ductility Testing Equipment

Product Code :
TEST5086RFQLAB-0001

Description :

Ductility Testing Equipment for Testing Lab Equipment Tender Suppliers India

Technical Specification :

For determining the hardness number of mastic asphalt for flooring. It consists of an internally insulated cabinet to the base of which is fitted a water bath having two taps. The bath is heated by an immersion heater and the temperature is controlled with a thermostat at 350+/- 0.50C. A 6.35 mm dia pin is loaded on the specimen by means of a lever to give 31.7 kg. Weight. A dial gauge 0.01 mm x 25 mm is provided to record the penetration of pin into the specimen.

We are a leading manufacturers of Ductility testing equipment for a range of industries, including materials science testing lab. We offer full range of Ductility testing equipment, including Ductility testing kit, Ductility testing machine, Ductility testing tools, Ductility test equipment, Ductility test machines, Ductility for Lab Testing Instruments. We are suppliers of materials testing tools and equipment for the construction industry. Our mission is to provide reliable, accurate, and easy-to-use Ductility testing equipment that helps customers build better, safer, and more sustainable infrastructure.
